In the Claims

1. (currently amended) A method of stimulating the process of Aquilaria resin formation by making wounds on the Aquilaria's trunk consisting of:
  - a) Selecting Aquilaria aged between 5-9 years old with 35-55 centimeters in diameter of the trunk;
  - b) Making a number of wounds wound on said Aquilaria trunk by removing an outer layer forming a rectangular shaped wounds wound;
  - c) Cutting a channel around each rectangular wound;
  - d) Drilling a plurality of holes within said rectangular wound deep into heartwood of said Aquilaria; and
  - e) Collecting Aquilaria resin.
- 2-4. (canceled)
5. (currently amended) A method of stimulating the process of Aquilaria resin formation comprising the steps of:
  - a) making a plurality of wounds wound on a stump of a cut down Aquilaria by removing an outer layer forming a rectangular shaped wounds wound;
  - b) drilling a plurality of holes within each said rectangular wound deep into heartwood of said Aquilaria; and
  - c) cutting a channel around each wound; and
  - d) e) making a hole at a root of said Aquilaria to allow the stump to die slowly and accumulate the resin.
- 6-7. (canceled)
